GLOSSARY

RAPEX System: Rapid alert system for the exchange of information on measures taken to prevent or restrict the marketing of dangerous consumer products with the exception of food, pharmaceutical and medical devices, which are covered by other mechanisms.

Notification: Alert received from a Member State on measures taken regarding a dangerous product.

Reaction: Information received from countries participating in RAPEX on follow-up action taken concerning dangerous products in response to a RAPEX notification. The reactions can be sent when a notified product is found and measures have been taken, or when the reacting Member States disagrees with the risk assessment performed by the notifying authorities.

Notification “For information”: Alert that does not legally require follow-up but may be of interest to other Member States (for example, a product whose risk level cannot be established). These notifications are only made available to the responsible national authorities and are not published on the RAPEX weekly report. These notifications are however also taken into account in the present statistics.

Compulsory measures: Measures taken by national authorities (e.g. ban on sales, withdrawal of the product from the market) or by the customs authorities (e.g. rejection of import).

Voluntary measures: Measures adopted on a voluntary basis by a producer or distributor, in general without any intervention of Member State authorities. A typical example of a voluntary measure is a recall of the dangerous products from consumers by the distributor or producer.

Consumer products: Products that are intended for, or made available to consumers.

Professional products: Products only made available to professionals, which are not likely to be used by consumers.

Risks other than those related to consumers’ health and safety: risks to other public interests protected via relevant EU legislation. They include risks related to electromagnetic disturbance, energy consumption, environment, incorrect measurement and security.

INTRODUCTION

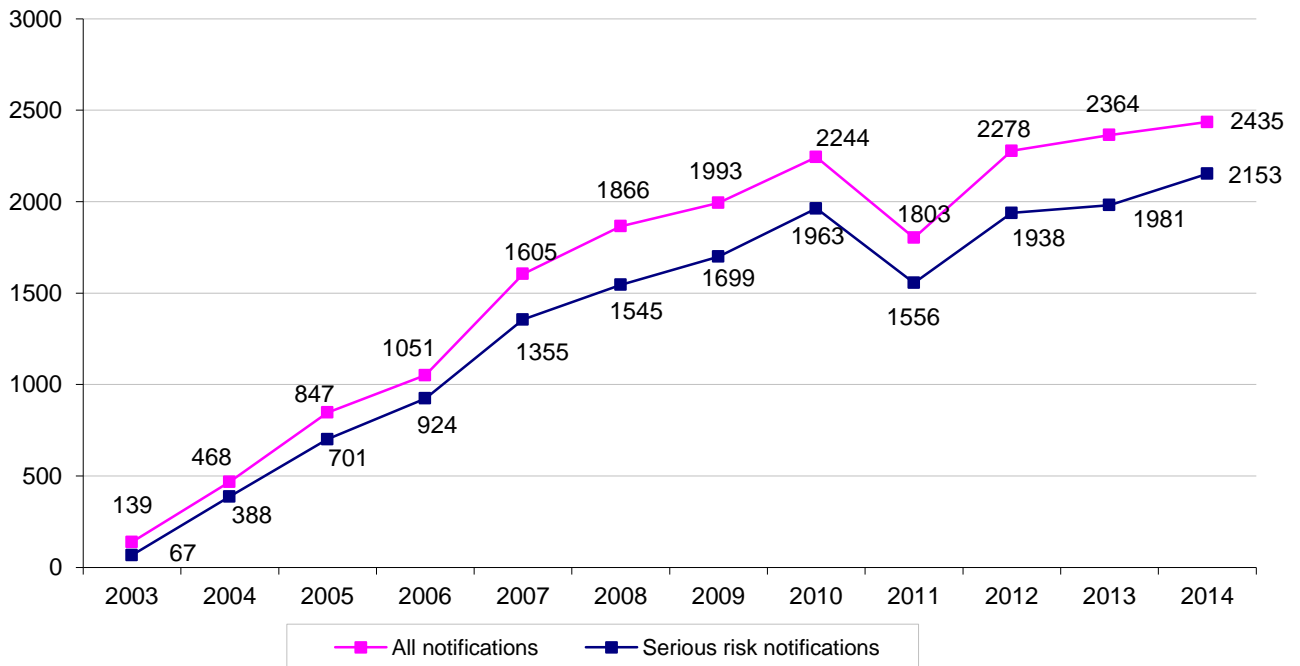

The European rapid alert system for dangerous products ensures that information about dangerous products withdrawn from the market and/or recalled from consumers anywhere in Europe is quickly circulated between Member States and the European Commission, so that appropriate action can be taken everywhere in the EU. **Thirty-one countries**, all countries of the European Union + the EFTA/EEA countries Iceland, Liechtenstein and Norway, participate in the system.

In 2014, all participating countries notified dangerous products and the amount of alerts per country was similar to that registered the previous year with some small changes in "ranking".

The following five Member States accounted for half of all RAPEX notifications on dangerous products:

Hungary	12 % (291 notifications)
Germany	11 % (273 notifications)
Spain	11 % (272 notifications)
France	7 % (163 notifications)
Cyprus	6 % (151 notifications)

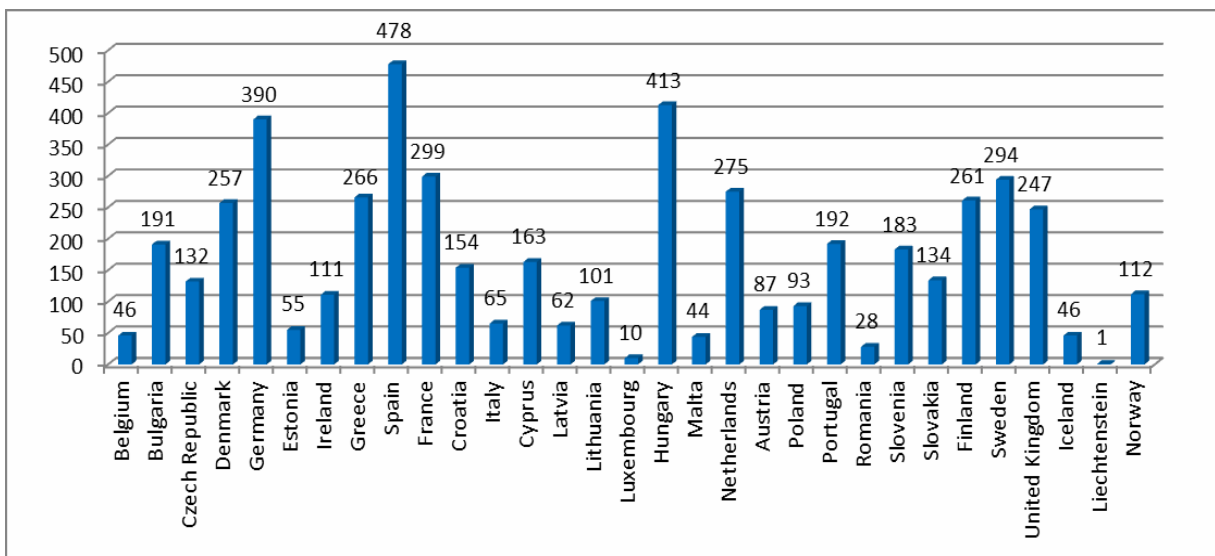

Graph 1 — Total number of notifications (including professional products and products posing other risks than health and safety): evolution 2003-2014

NOTIFICATIONS AND FOLLOW-UP ACTIONS (REACTIONS) IN RAPEX

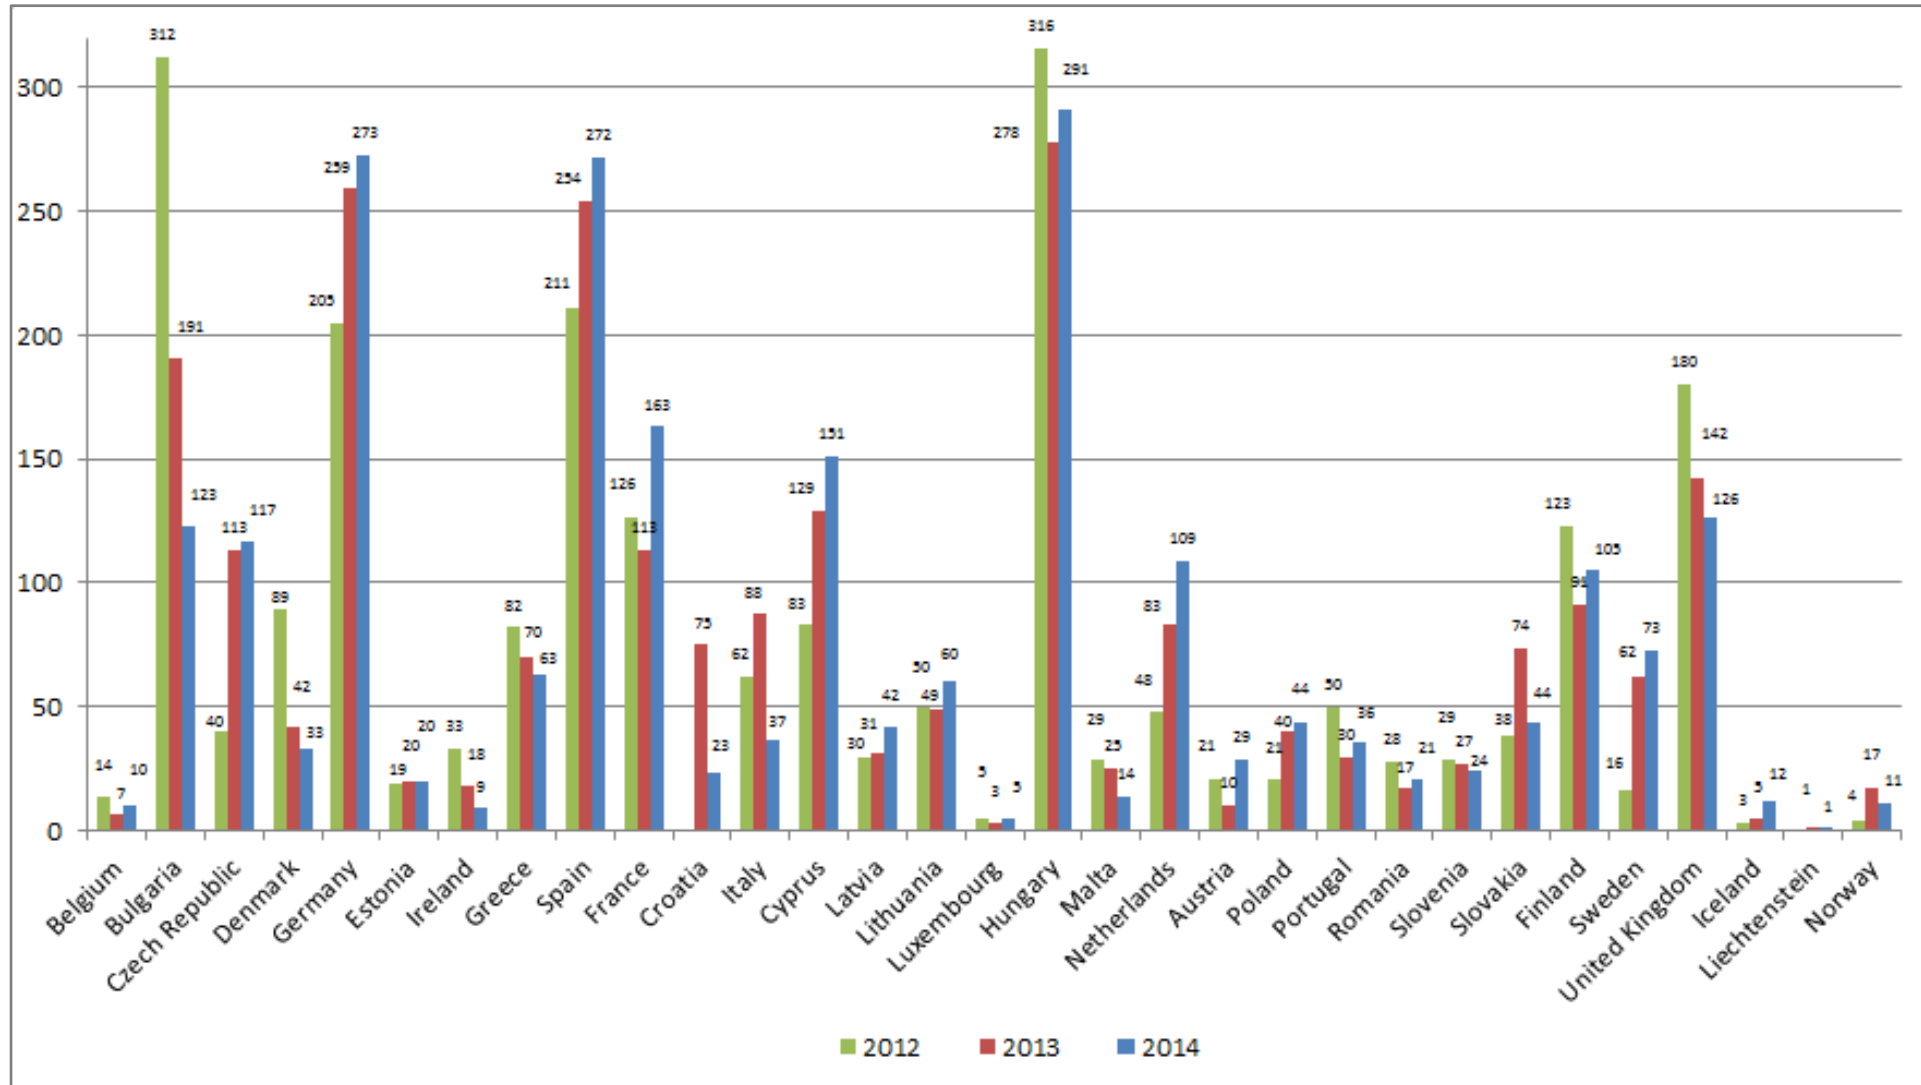

Graph 2 – Overall RAPEX alerts per country in 2014

This graph aims at presenting a comprehensive picture of the national authorities' activity in RAPEX. It shows the number of total alerts submitted, that is, all notifications and reactions (follow-up actions). The number of notifications includes notifications for all risk levels and those transmitted "for information", notifications for professional products and for products posing other risks than health and safety.

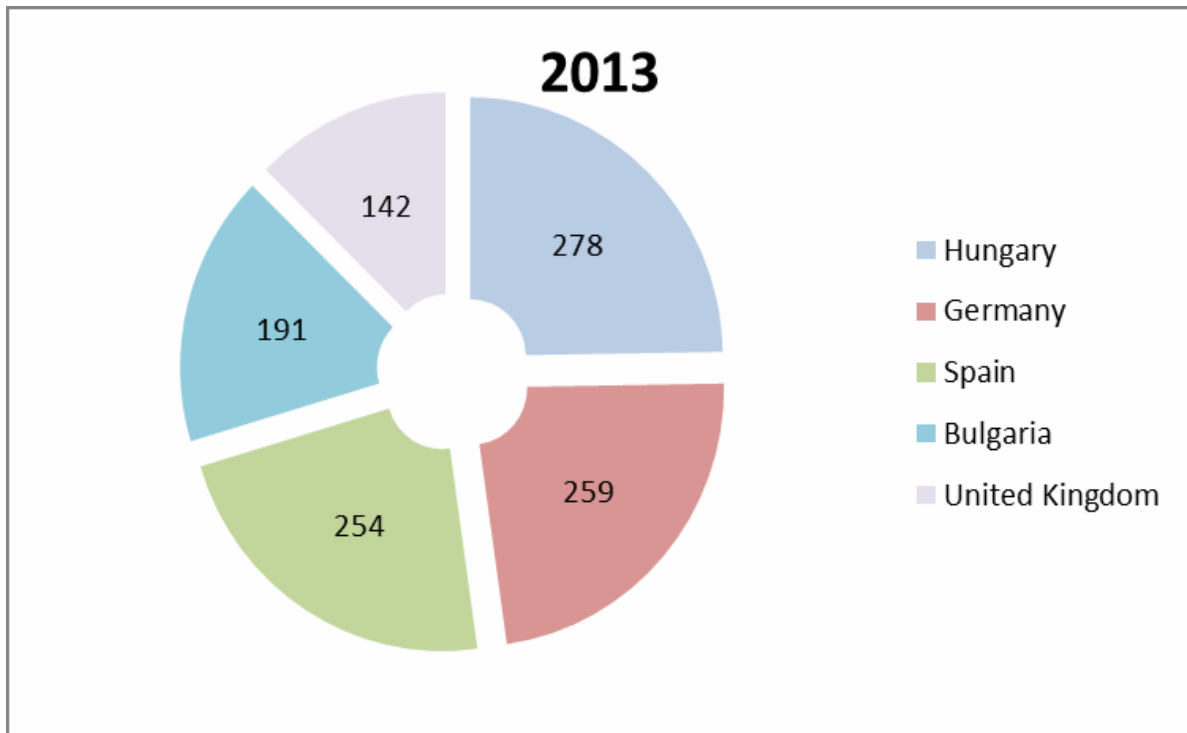

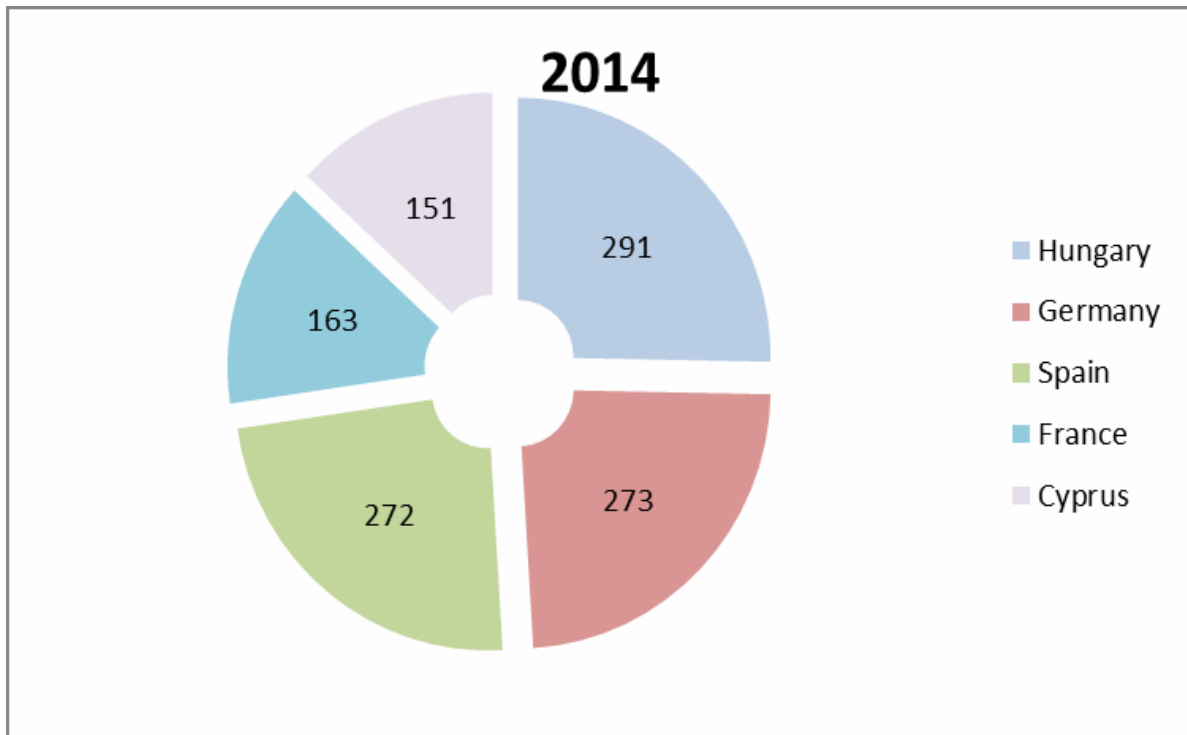

NOTIFYING COUNTRIES

Graph 3 — Total number of notifications by notifying country, compared with the past two years

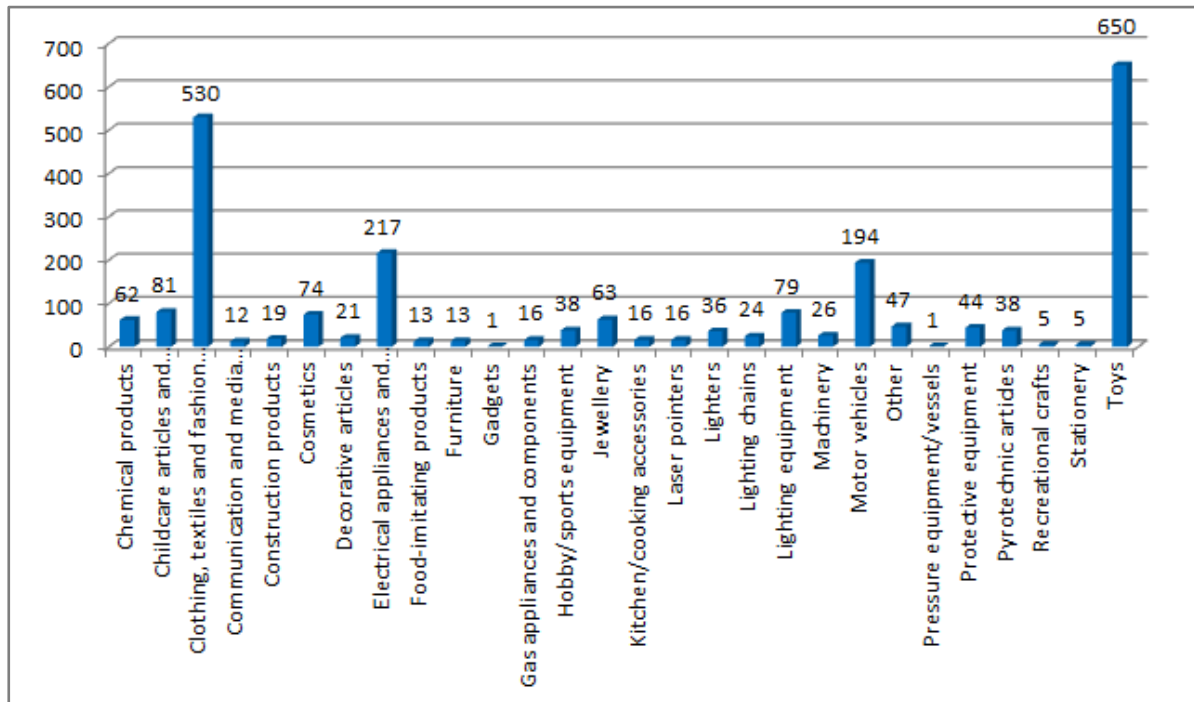

Graph 4 — Top five notifying countries in 2014, compared to 2013

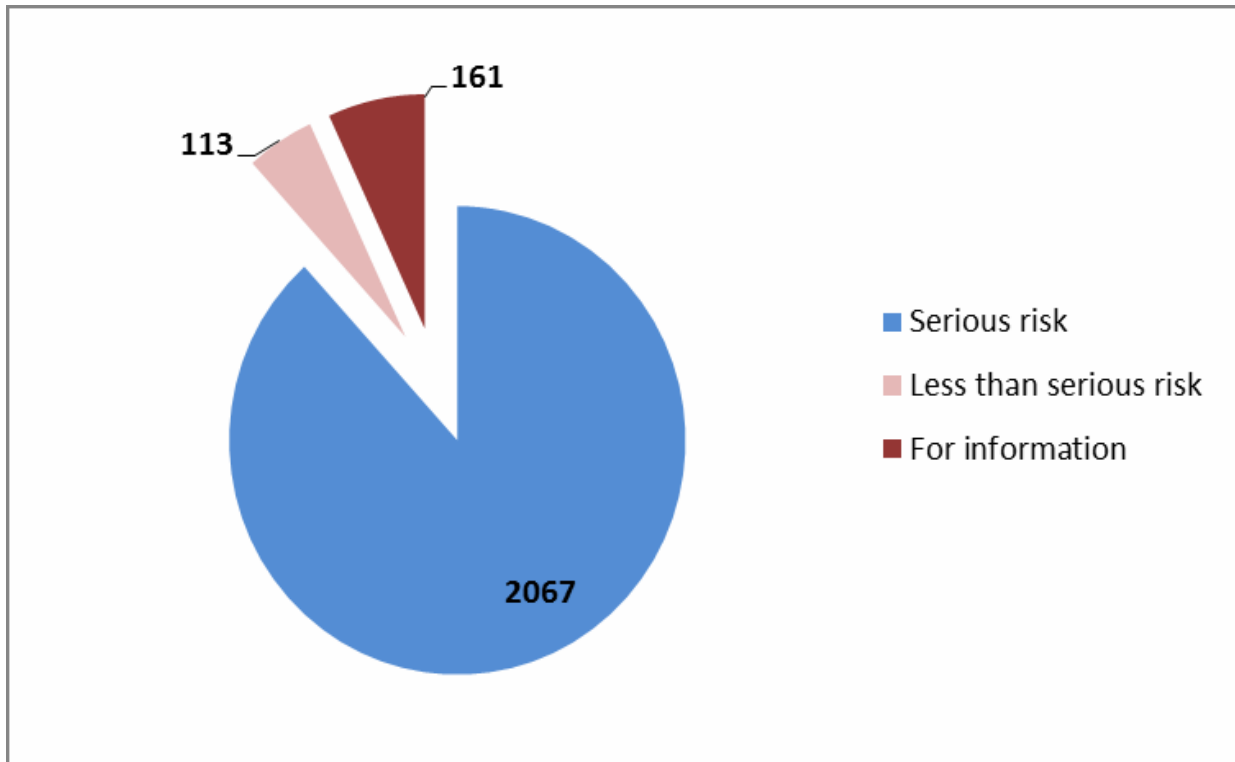

WHAT IS BEING NOTIFIED

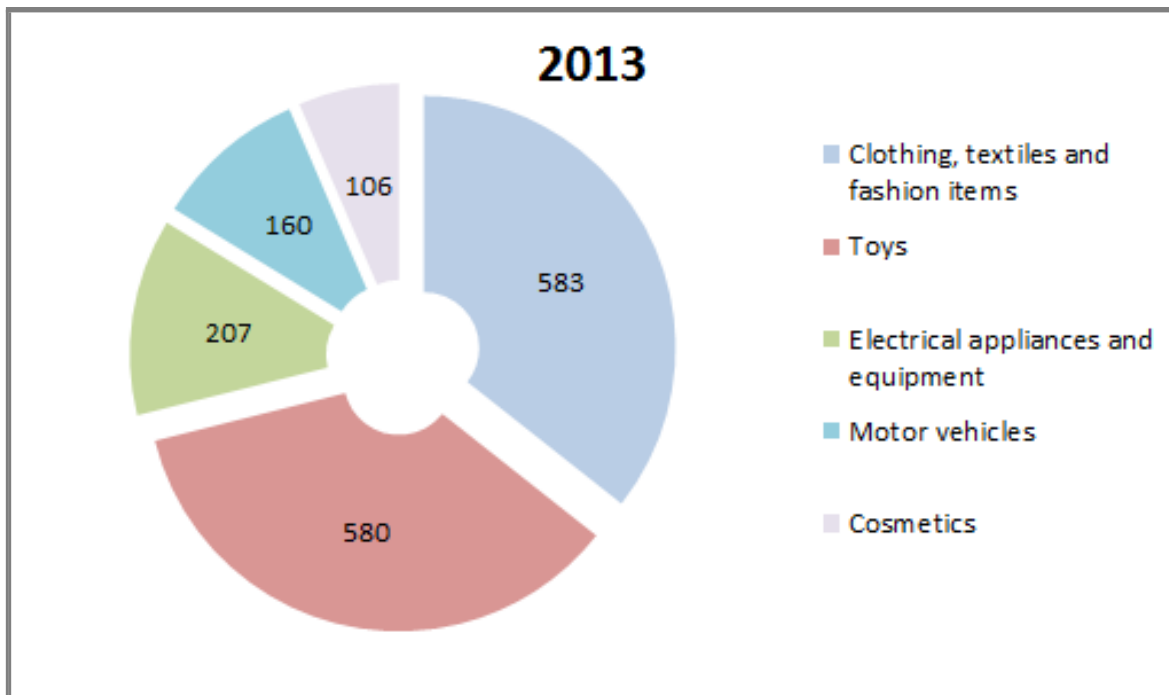

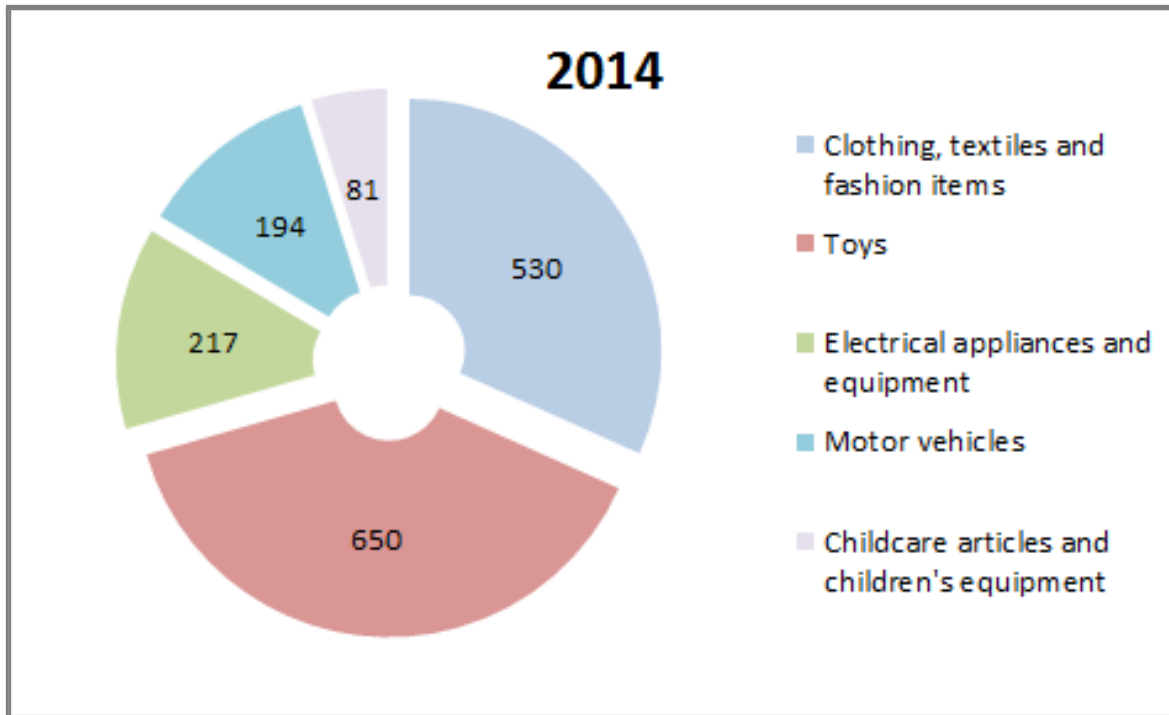

Graph 5 – Number of notifications by product category (absolute values) in 2014

Graph 6 — Total number of notifications by risk level in 2014

Graph 7 — Top five notified product categories in 2014, compared to 2013

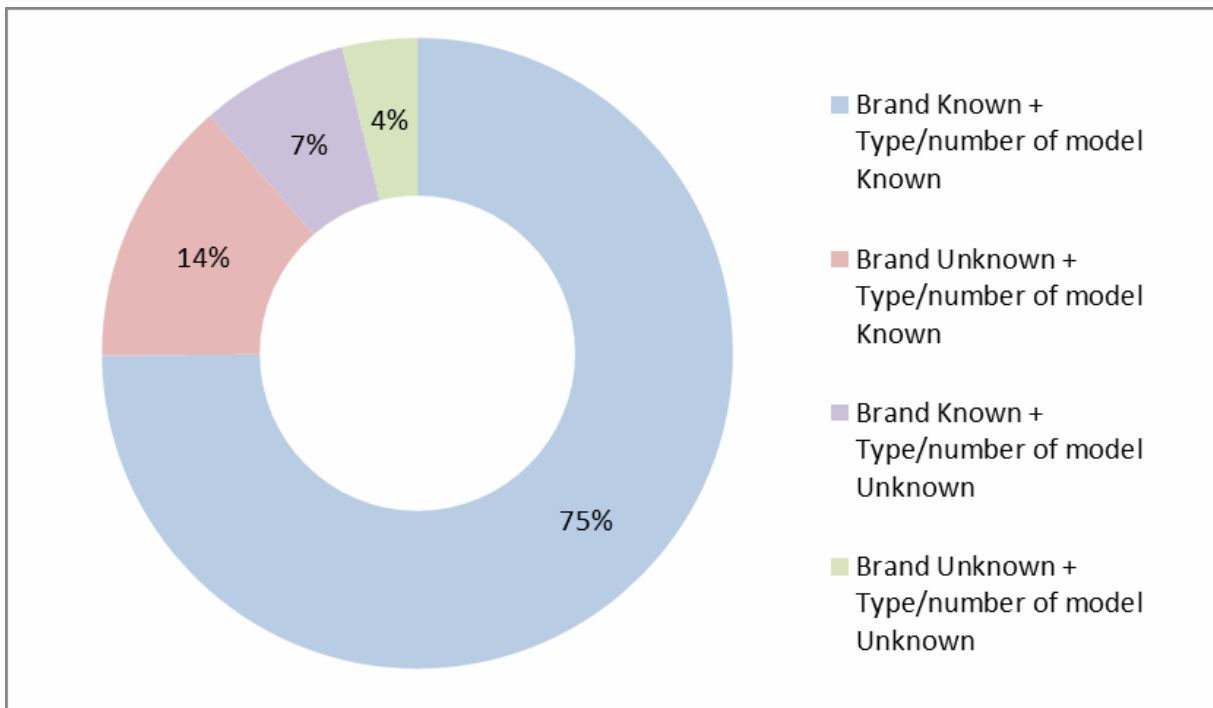

BRAND AND MODEL NUMBERS OF NOTIFIED PRODUCTS

Table 1 — Number of notifications in which brand and model numbers are known/unknown in 2014

	Type/number of model known	Type/number of model unknown	Total
Brand known	1753	177	1930
Brand unknown	321	90	411
	2074	267	2341

Graph 8— Notifications submitted in 2014 in which brand and model numbers are known/unknown

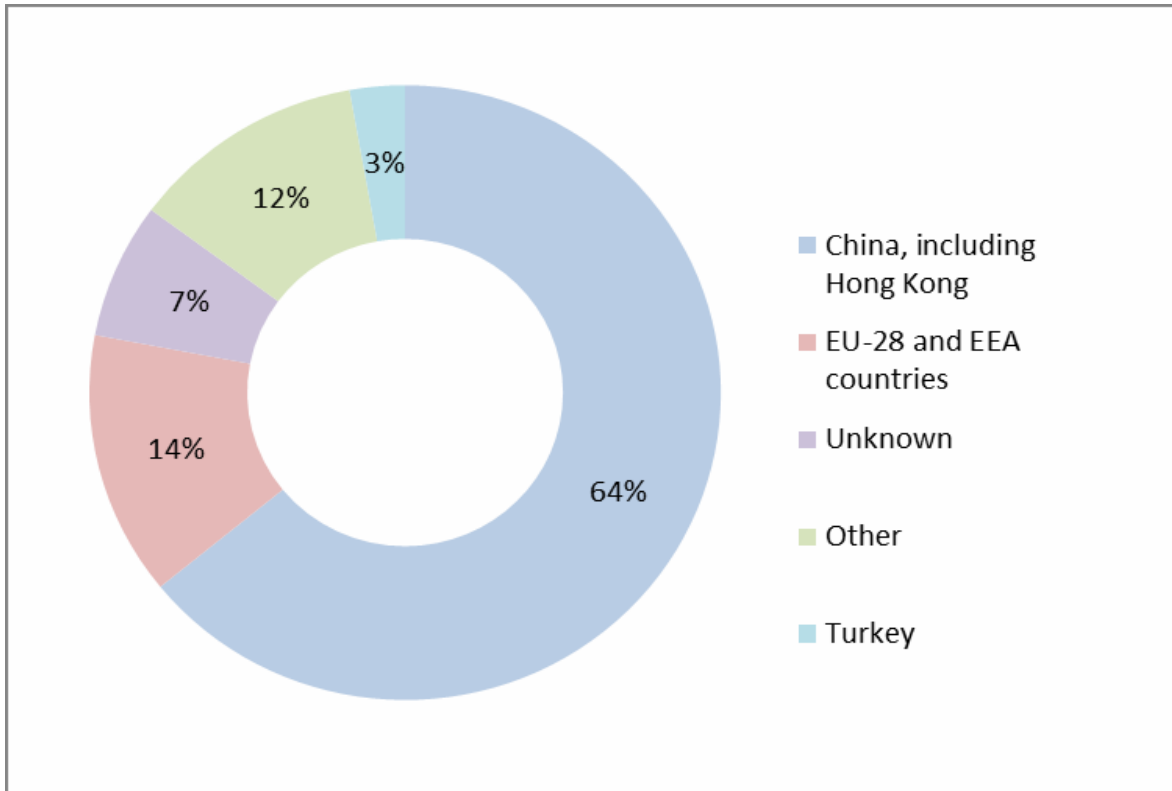

WHERE DO THE NOTIFIED PRODUCTS COME FROM

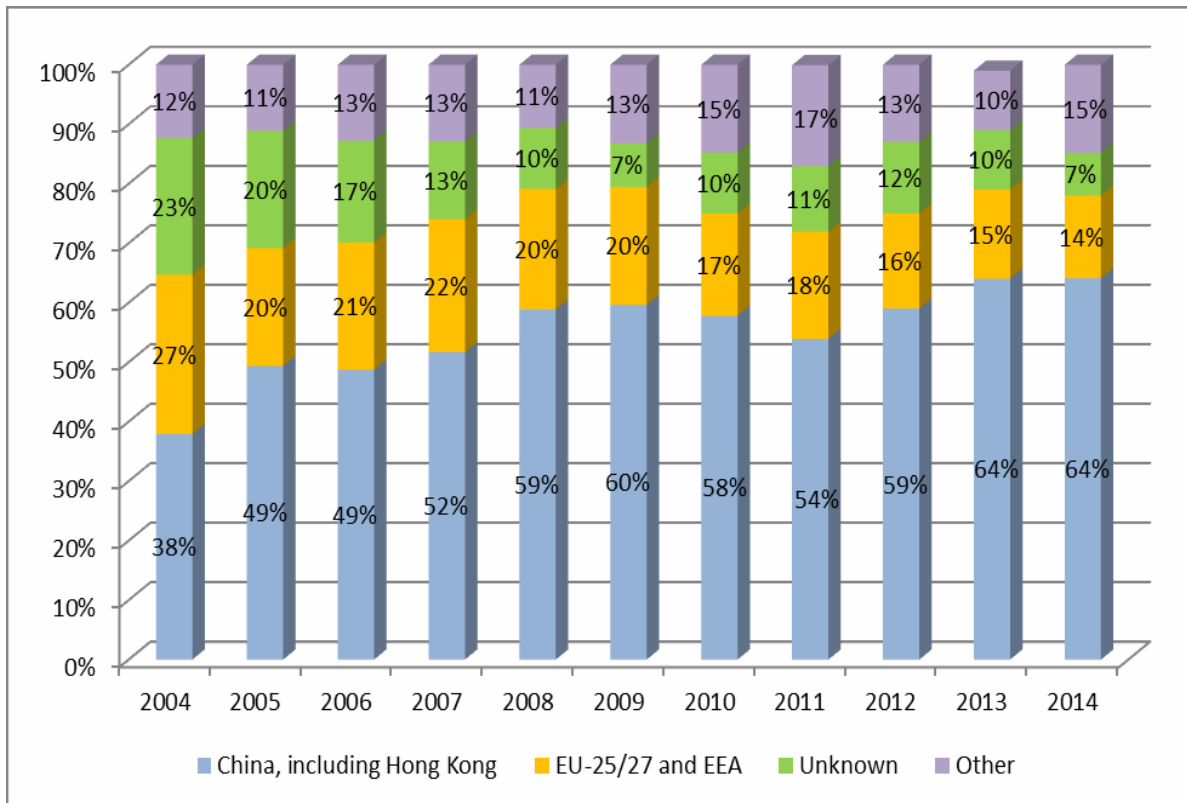

Graph 9 — Number of notifications by country of origin in 2014

Graph 10 — Notifications by country of origin in 2014

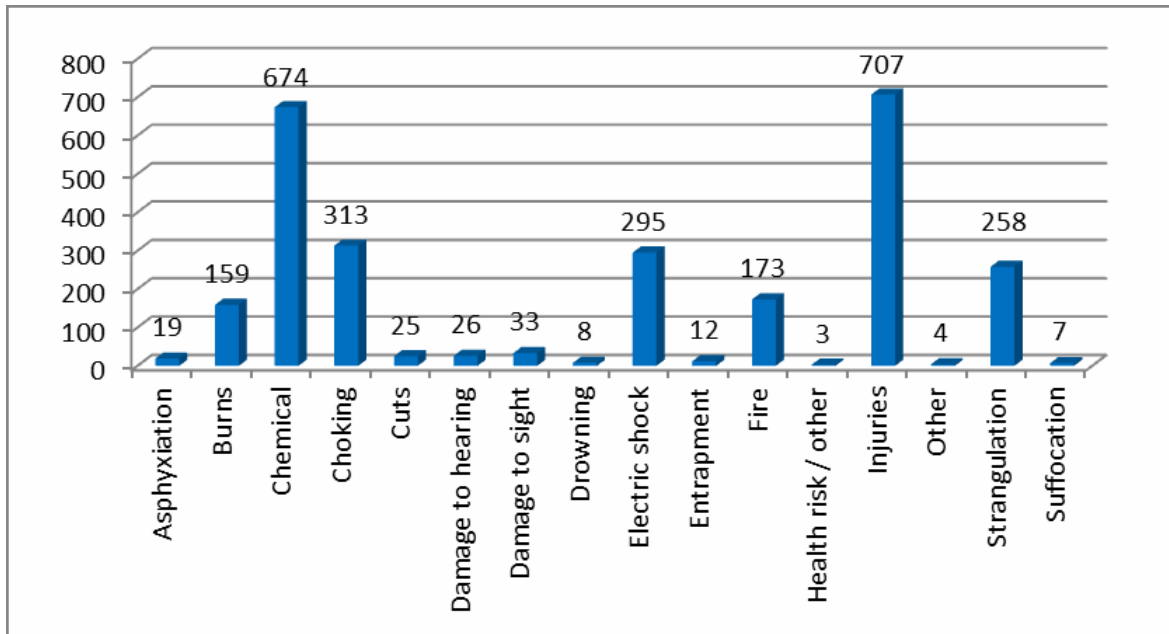

Graph 11 — Notifications by country of origin: evolution 2003-2014

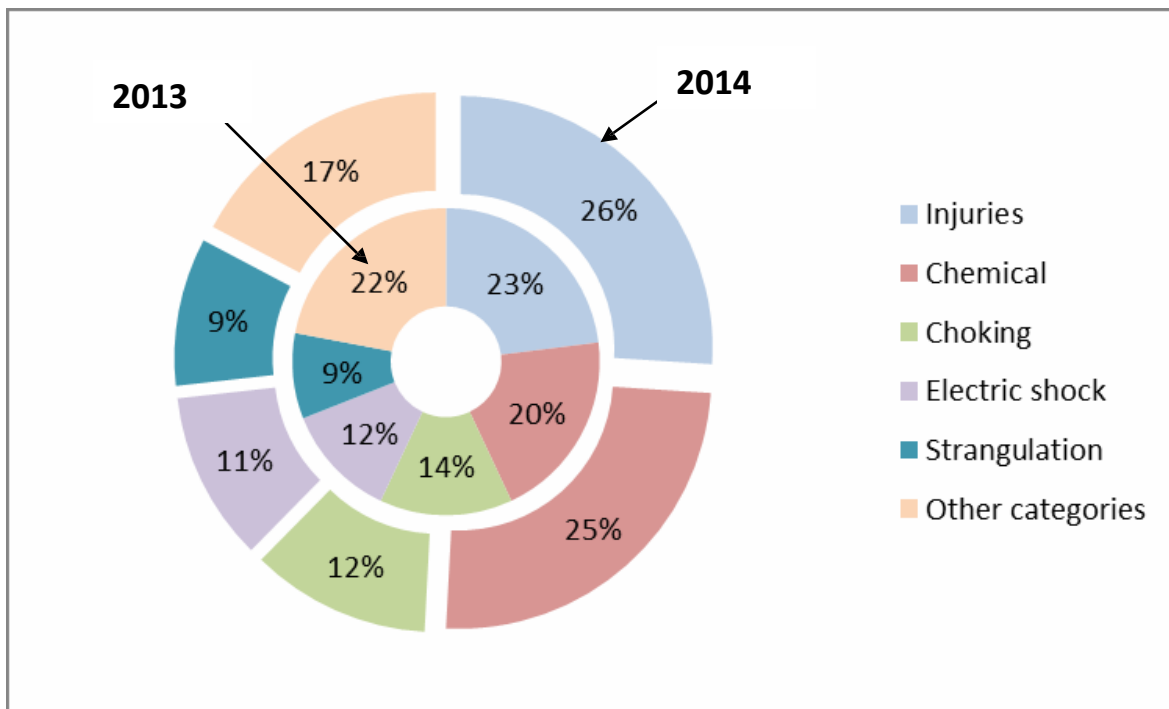

WHAT ARE THE RISKS

Graph 12 — Number of notifications by type of risk (absolute values) in 2014

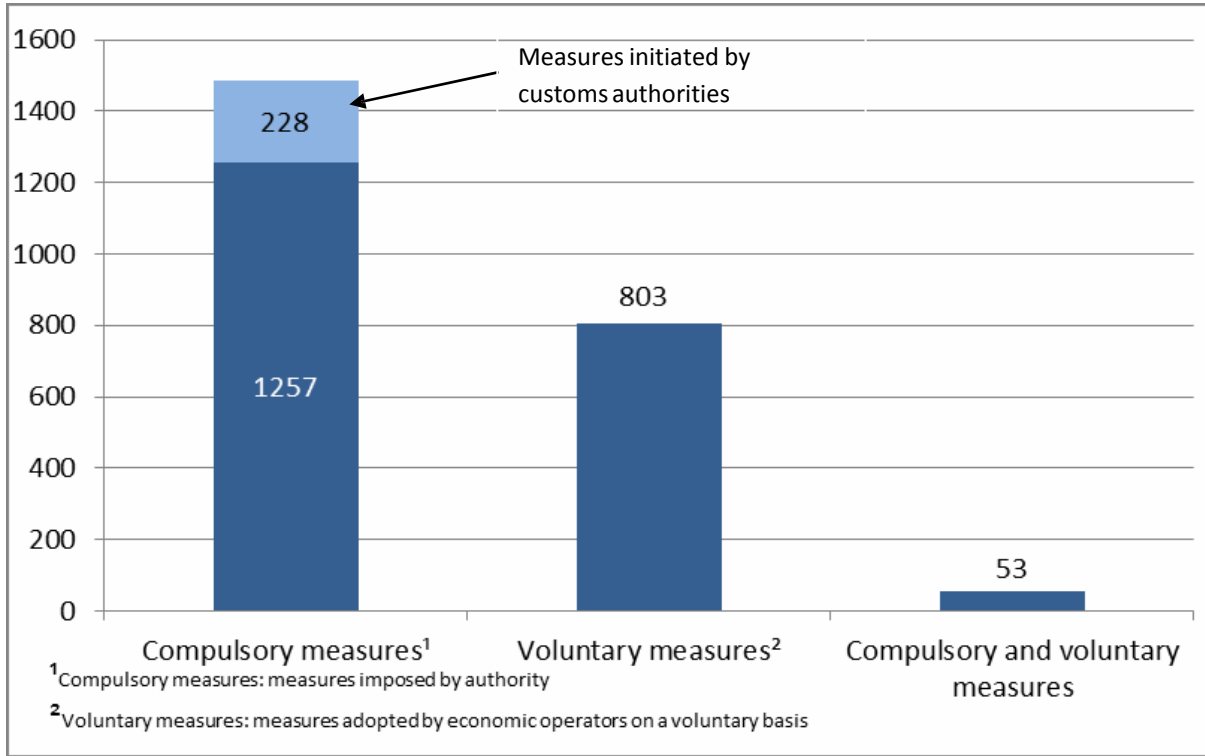

Graph 13 — Top five notified types of risk in 2014, compared to 2013

WHAT IS THE FOLLOW-UP TO NOTIFICATIONS

Graph 14 — Number of notifications by type of measure (absolute values)

Graph 15 — Notifications by type of measure

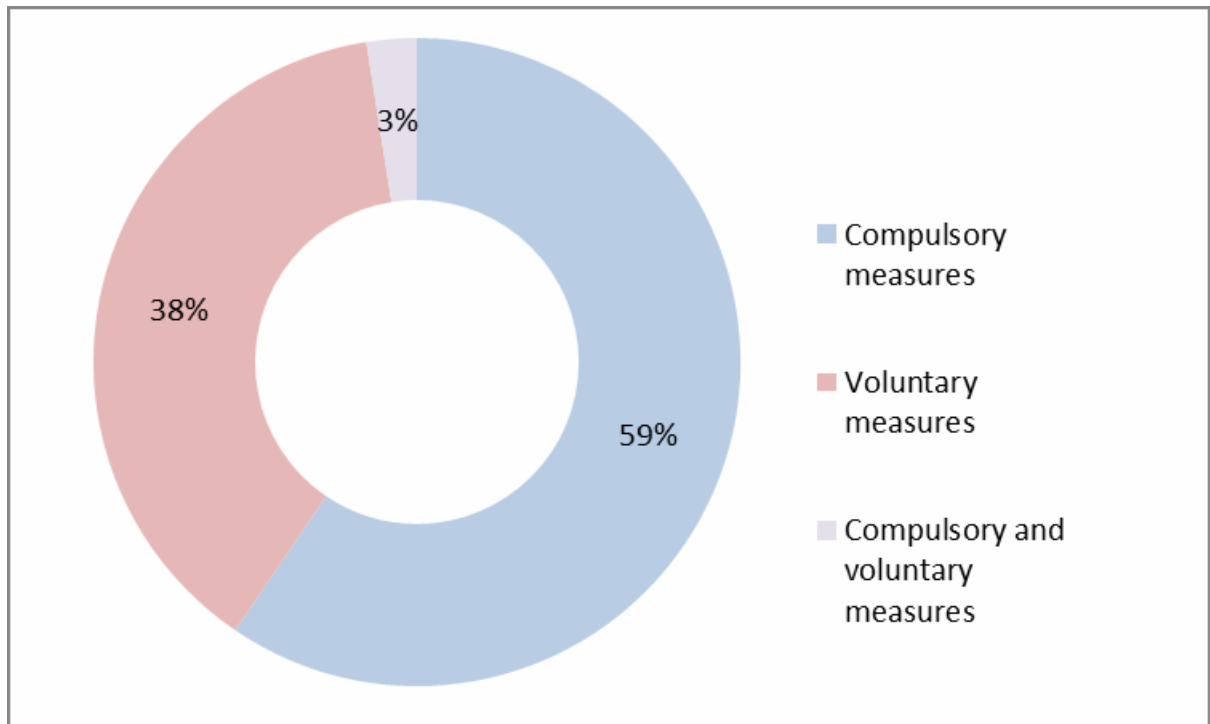

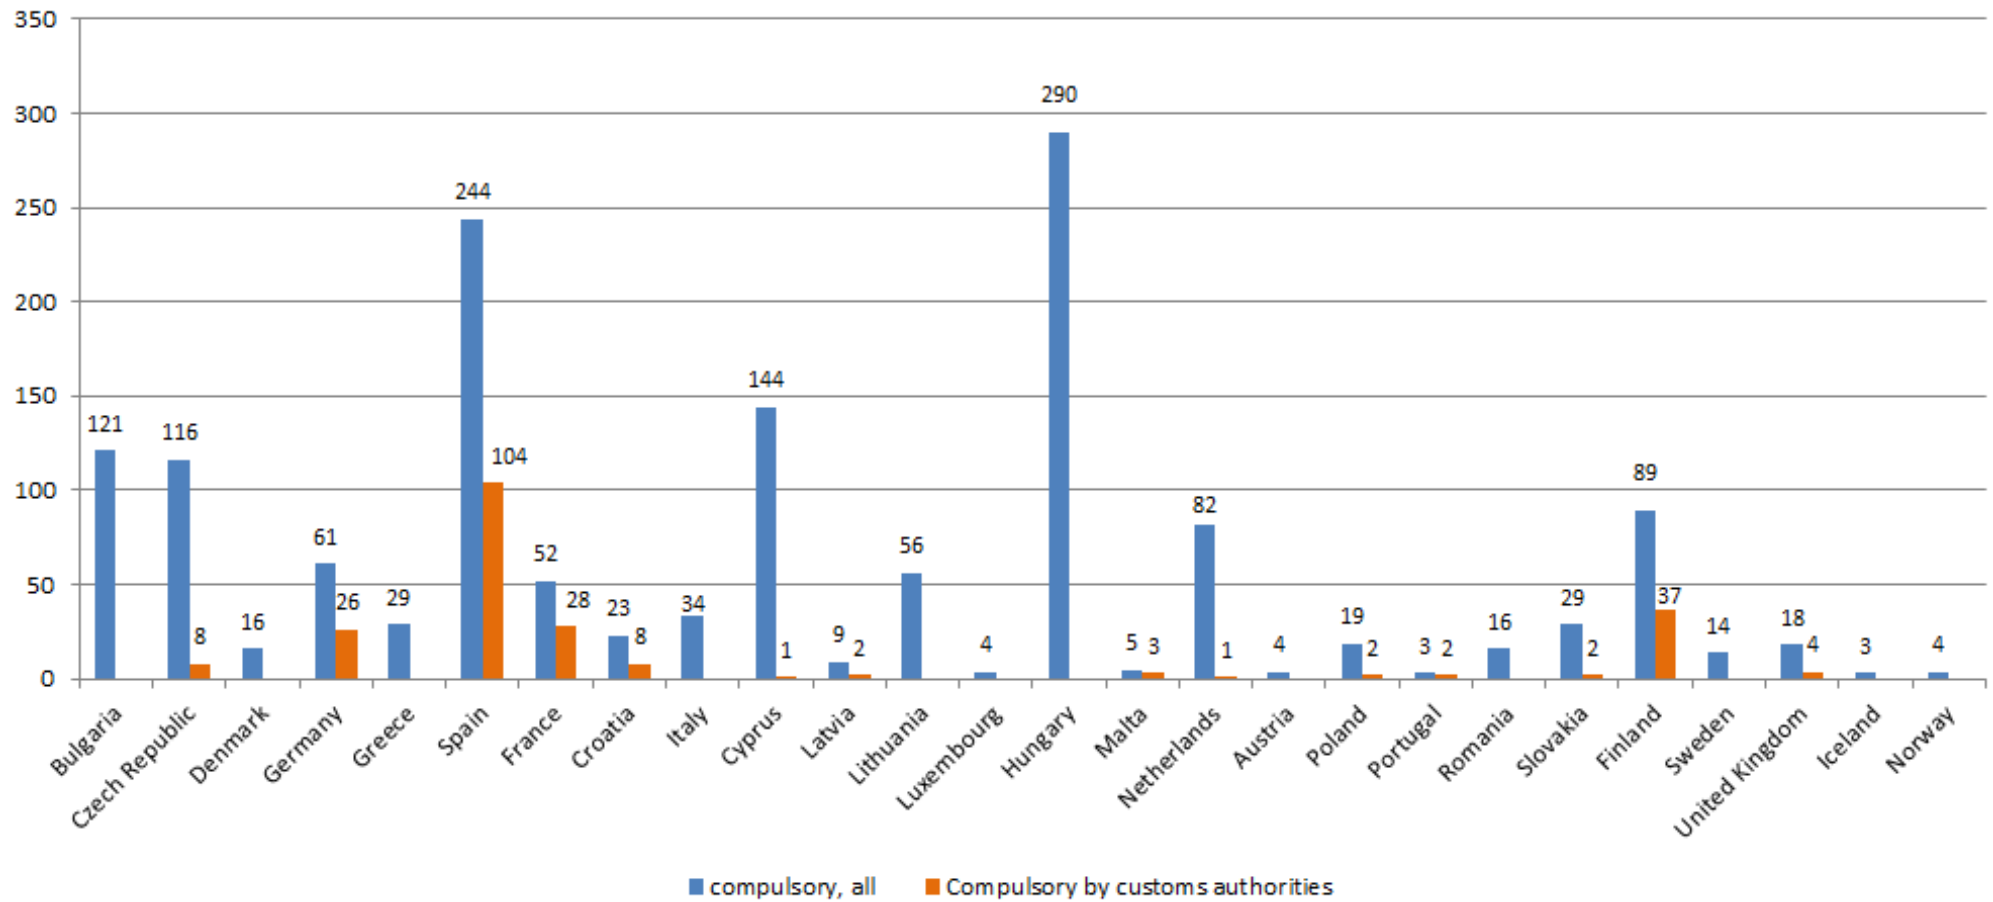

Table 2 — Number of notifications by type of measure, per country (absolute values) in 2014

	Compulsory measures	Voluntary measures	Compulsory and voluntary measures	Total
Belgium		10		10

Graph 35 — Number of notifications by type of risk

HOW TO OBTAIN EU PUBLICATIONS

Free publications:

- one copy:
via EU Bookshop (<http://bookshop.europa.eu>);
- more than one copy or posters/maps:
from the European Union's representations (http://ec.europa.eu/represent_en.htm);
from the delegations in non-EU countries
(http://eeas.europa.eu/delegations/index_en.htm);
by contacting the Europe Direct service (http://europa.eu/europedirect/index_en.htm)
or calling 00 800 6 7 8 9 10 11 (freephone number from anywhere in the EU) (*).

(*) The information given is free, as are most calls (though some operators, phone boxes or hotels may charge you).

Priced publications:

- via EU Bookshop (<http://bookshop.europa.eu>).
